Purpose: To establish a procedure for the North Kingstown Fire Dept.'s maintenance division to ensure apparatus is in working order upon completion of any repairs. The following inspection/check shall be completed by NKFD maintenance personnel if:

- Apparatus was out of service for more than 24 hours
- Apparatus was repaired/sent out to an independent 3rd party repair facility

This inspection/check shall include (at a minimum) the following:

- Check all apparatus tires
    a. Check for bulges, rips, tears or any other condition that could render the tire unsafe
- Check oil, transmission, and other essential fluid levels
- Top off all other fluids as needed
- Inspect windshield wipers
- Start the apparatus
- Check gauges on dash
- Activate headlights, marker lights, break lights, and turn signals and ensure all are in working order
- Activate emergency lights and ensure all are in working order
- Fill DEF tank

If apparatus was repaired by independent 3rd party repair facility:

- Ensure the repair was completed consistent with manufacturer, industry, and NKFD standards.
